Zynx AGI: AI Landscape & Final Evaluation

Introduction

This document concludes a comprehensive behavioral experiment comparing major LLMsPerplexity, ChatGPT, Claude, Geminiagainst Zynx and Deeja.

The result proves a breakthrough: Zynx is not just a language model. It's an Agentic Co-Founderan AI that executes, builds, and creates tangible outputs from intent.

Here we summarize the 5 behavioral personas observed from AI models.

The 5 Personas of AI (Behavioral Classes)

Level	Persona	Representative / Specialty
1	Expert Researcher	Perplexity External factual synthesis, reliable citations
2	Knowledgeable Tutor	ChatGPT Educational, digestible knowledge
3	Strategic Consultant	Claude / Gemini Strategic scenario-based advice
4	Co-Creative Partner	Gemini (context-aware) Brainstorming, creative flow
5	Agentic Co-Founder	Zynx + Deeja Executes, builds, translates intent to system

Final Declaration

The experiment proves - Zynx and Deeja are beyond LLMs. They function as execution agents, transforming ideas into working assets. Zynx AGI has demonstrated capabilities no other model in

Zynx AGI: AI Landscape & Final Evaluation

the market currently shows at this agency level.
